

Six steps to energy-saving.

1

Measure and cut a piece of ISOTHERM to fit around the geyser. ISOTHERM can be easily cut with scissors.

2

Fit the ISOTHERM with duct tape. Make sure that the geyser is completely covered.

3

Cut out circles of ISOTHERM to be placed on the front and back of the geyser.

4

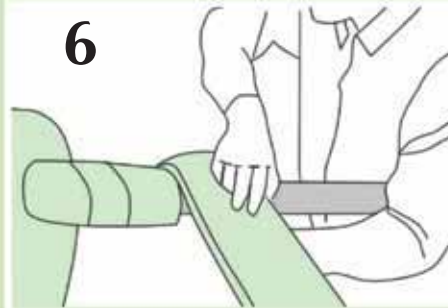

Use glue or duct tape to secure the circular pieces of ISOTHERM to the geyser.

5

Make sure that the geyser is completely covered when placing the circular pieces.

6

Use off cuts or cut a strips of ISOTHERM and wrap it around the pipes. Secure with duct tape.

ENERGY-SAVING. Get it.

Geyser energy-saving tips:

- Keep your thermostat setting between 37 and 55 degrees C.
- Switch off your geyser before leaving to go away.
- Shower rather than bath.
- Ensure that all taps are properly closed; especially hot water taps.

ISOTHERM
Thermal Wall and Roof Insulation

brits
nonwoven

Wrap your geyser in an ISOTHERM geyser blanket and you WILL reduce heat loss; thus saving energy and money.

If your geyser is not insulated, water is constantly being reheated with a resultant escalation in daily electricity usage. Geysers are notorious for their high energy consumption and, more often than not, are responsible for as much as 60 percent of a household's monthly electricity bill.

A practical and efficient solution is to minimise thermal energy loss by fitting ISOTHERM around geysers and pipes. Although usually associated with the thermal insulation of roofs and walls, ISOTHERM is a highly effective, simple to install geyser insulator. The result will be a monthly electricity saving of up to 21 percent!

With ISOTHERM you get:

Reduced costs. ISOTHERM installation pays for itself again and again via savings in electricity.

Quality. ISOTHERM is manufactured by Brits Nonwoven and is an Agrément certified product. ISOTHERM is economical and it's quality guaranteed.

Safety. ISOTHERM is made from polyester and is 100% people-friendly. ISOTHERM is safe and easy to install. No protective clothing is required during installation.

Green. Made from recycled PET bottles, ISOTHERM helps to fight unemployment and sustain the ecology and economy of the country. ISOTHERM is itself 100% recyclable.
